**Remote Monitoring System Services**

**Remote Monitoring System Services** are available to residents of Butler County who are age 60 and older and who are eligible for nursing home level of care. Remote monitoring systems are electronic equipment, which are installed into a consumer's home and connected to a response center through the telephone line.

**Services include:**

**Personal Emergency Response Systems** – Consumer has a pendant that will summon emergency services when activated

**Medical Monitoring Systems** – Consumer has vitals taken on a regular basis, as prescribed by a physician for monitoring a chronic medical condition. The name of this equipment varies between vendors

**Medication Monitoring Systems** – This equipment notifies a consumer that it is time to take medication and makes that medication available. In the event the consumer does not remove the medication from the dispensing machine, the monitoring center is notified

These services offer supervision of emergency situations, medical conditions, and medication dispensing for consumers who are in need of these types of support services. Individuals must live in an independent residence in the community. The typical consumer who wants or needs remote monitoring services generally lives alone or is alone for significant parts of the day; have no regular caregiver for extended periods of time; and/or may require extensive routine supervision. Remote Monitoring System Services support independent living and often may prevent institutional placement.

Funding for these services may be provided in full or in part through the Butler County Area Agency on Aging. Consumers wishing to apply for these funds are assessed for medical and financial need. The Area Agency on Aging contracts with agencies to provide the Remote Monitoring System Services. The provider is responsible for all aspects of service delivery to the consumer. For more information, contact the Area Agency on Aging at **724-282-3008** or toll free at **1-888-367-2434**.
